How to Draw A Snowflake

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5
				Draw a vertical line and mark its centre (a) Cross the centre with two lines (b), (c)	The main "body" of the snowflake is done, so we can now add the "arms" in almost end of the lines. Keep them symmetrical!	Sketch 2 circles (a smaller and a bigger ones) in the middle.	Draw a hexagon around the bigger circle and the middle of the sides touch the points of the arms	Fill the space between each of the arms and the body lines with a colour you choose.
