

I CAN SORT

Colours

HOW TO USE THIS ACTIVITY

USE IT ONCE

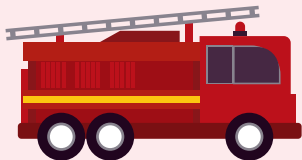

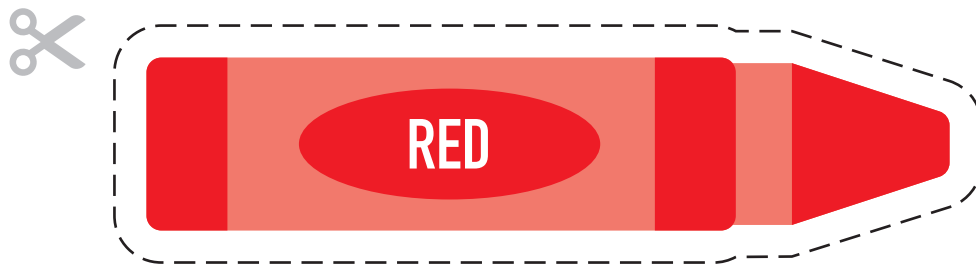

Print 4 activity pages and 1 picture page for each colour. Cut the pictures out and glue one colour crayon at the top of each activity page. Then mix up the different coloured pictures and let your child sort them and glue them onto the matching activity pages.

MAKE IT REUSABLE

Laminate the pages before cutting the pictures out. Then put velcro dots on the pictures and the activity page. Attach one colour crayon to the top of the activity page, and let your child stick on the pictures that match that colour. Then take them off and repeat with a different colour.

BUSY BINDER

If you'd like to put this activity into a busy binder, just use a hole punch on the left hand margin of each activity page.
